About me

I started writing code in secondary school using Scratch, then gradually progressed into Small Basic and onto Java. However, my interest in writing software didn't really take off until university, where we were introduced to C and Java. Alongside my studies, I have taught myself how to develop for iOS and the web.

Quick Learner | Reliable | Communicator | Team Player

Skills

I am most comfortable with the following technologies:

Java | Kotlin | HTML | CSS | JavaScript | React.js | AWS

Along with TypeScript, REST APIs and GraphQL, Docker and gRPC.

Experience

Expedia Group / Software Engineer
JUNE 2019 - JULY 2020
Primarily a backend engineer, but also completed some front-end tasks. I used technologies such as Kotlin and Spring, React.js with TypeScript, Docker, GraphQL and gRPC.

TravelHack
While at Expedia Group I helped organise and run a hackathon, with the goal of recruiting the following year's interns. I created two websites, one for promotional purposes and the other as a source of information during the event.
// todo: host site with links to promo and info sites & paste URL here

Education

BSc Computer Science / University of Bath
OCT 2017 - JUNE 2021, BATH, UK
I am still studying towards a BSc in computer science at the University of Bath, where my target outcome is a first class honours degree (~ GPA 4.0).
List of modules: https://bit.ly/2E9BTwI

A Levels / Crickhowell Sixth Form
SEPT 2015 - JUNE 2017, CRICKHOWELL, UK
I studied A Levels in Maths (with statistics), Physics and Biology.
